

Research & Development in Solar Energy (TEP-101)

Coordinator: Dr. Jorge Aguilera Tejero (aguilera [arroba] ujaen [punto] es)

Solar panel images banner.

The “Research & Development in Solar Energy” group focuses its activity on photovoltaic systems engineering, both those connected to the grid and standalone systems.

Research lines:

- Photovoltaic solar energy: connected to the grid, standalone
- Photovoltaic solar energy in the sphere of development cooperation
- Telemonitoring of photovoltaic systems
